Predictal is now NCQA Prevalidated

Oct. 20, 2023

enGen's fully integrated Utilization Management, Case Management, and Disease Management product – Predictal – has received The National Committee for Quality Assurance (NCQA) Population Health Management (PHM) Prevalidation status. This PHM Prevalidation is focused on population health management tools and related technology solutions that have functionality that helps health plans and other organizations meet population health management-related standards.

We are now Prevalidated in the following four NCQA defined programs of data integration and case management systems:

- Health Plan Accreditation
- Managed Behavioral Healthcare Organization (MBHO) Accreditation

- Population Health Program (PHP) Accreditation
- Case Management Accreditation

A NCQA Population Health Management in Health Plan Accreditation Prevalidation includes a rigorous evaluation of a submitted health IT solution's functionality.

NCQA's Population Health Management Prevalidation reviews population health management tools, data integration tools, risk stratification tools, care management systems tools, and other related health technology solutions providing functionality that completely meet or support factor-level requirements within applicable NCQA Population Health Management in Health Plan Accreditation Standards. A Prevalidation is a commitment to enGen's mission of driving a remarkable health experience through innovative healthtech, and a dedication to contributing to NCQA's mission to improve health care quality.

NCQA is a private, non-profit organization dedicated to improving health care quality. NCQA accredits and certifies a wide range of health care organizations and recognizes clinicians and practices in key areas of performance, as well as helps consumers, employers, and others make more informed health care choices – learn more: https://www.ncqa.org/.
